

Navy Assistant Football Coach Files Religious Objection to Vaxx. Fired Immediately.

This is a big deal.

Assistant coach Billy Ray Stutzmann says he was fired for not complying with the program's requirement that all staff members receive a COVID-19 vaccine.

Stutzmann wrote online that he is "unable to follow the requirements of the Naval Academy's COVID-19 policy." He said he applied for a religious exemption to the requirement that wasn't granted.

Big chill for climate doom: Arctic Sea ice is expanding

In addition, the Arctic sea melt this summer was the lowest in 15 years, and the expanse of Antarctica

(WND News Center) – Less than 10 years remain before the oft-claimed "tipping point" for the planet, but sea ice in the Arctic Ocean is the highest it's been in nine years, increasing more than 30% from last year, while the Antarctic's level is well above normal.

That's according to the Ocean and Sea Ice Satellite Application Facility's High Latitude Processing Center, pointed out climate-change skeptic Tony Heller.

He noted the Arctic Ocean gained a record amount of sea ice during the first week of September.

"Most years the Arctic loses ice, but this year ice extent has increased" more than 77,000 square miles, he wrote on Twitter, adding the news likely would not be reported by CNN, BBC News or the New York Times.

Meanwhile, the sea melt this summer was the lowest in 15 years, and the expanse of Antarctic sea is well above average.

**Kamala: “The right of women to make decisions about their own bodies is not negotiable.”
Now do vaccines!**

Here, Vice President Kamala Harris draws a line in the sand about abortion, saying, “The right of women to make decisions about their own bodies is not negotiable. The right of women to make decisions about their own bodies is their decision, it is their body.”

It’s the whole “my body, my choice” thing, right? This on the same day that the administration is making it mandatory for millions of Americans to receive the vaccine. This cognitive dissonance will be completely ignored by the administration, the media, and their leftist defenders.

You know, it’s one thing to be an extremist but at least try to be a consistent extremist. It lends an air of credibility to the lunacy.

Australia Now Says You Can Acquire ‘Freedom Pass’ to Acquire Your God-Given Freedom.

If your freedom is not God given but granted by government, it can and will be taken away.

This is how it happens. It looks like some low level middle intelligence power hungry corrupt politician who looks like a regional manager of a fast food chain giving a press conference to a team of unquestioning reporters.

Make no mistake. This is coming to America. They even said they are working with other countries. Hmmm. You think Joe Biden and Tony Fraudci might be interested in such a thing? You betcha.

Interestingly, it's not called a "Vaccine Pass" but a "Freedom Pass." So what other requirements could be added into obtaining a freedom pass?

In the words of Benjamin Franklin, "Those who would give up essential Liberty, to purchase a little temporary Safety, deserve neither Liberty nor Safety."

A bold Catholic investment in inner city education

Servant of God Mother Mary Lange's example is being embodied in the first Catholic school opened in Baltimore city in 60 years, as the Mother Mary Lange Catholic School welcomed its first 400 students in late August.

It's a safe bet that "Mother Mary Lange" is not a household name in most U.S. Catholic circles. That unhappy state of affairs may change, though, thanks to a courageous initiative now underway in Baltimore, one of America's most troubled cities.

The archdiocese raised more than \$25 million to launch this state-of-the-art facility for some of the city's most underprivileged youngsters. Partnerships with local universities, businesses, non-profit organizations, and social service agencies will enhance the school's academic excellence with extended-care, summer, and enrichment programs. Unlike too many modern inner-city

schools, which look more like bunkers or prisons, the Mother Mary Lange School was designed to be open to the hard-pressed neighborhoods of West Baltimore, better known as the locale for many of the urban depredations depicted in *The Wire*.
